EDUCATION

Pharos University, Alexandria
B.Sc. in Computer Science and Artificial Intelligence – Department of Cyber Security
2022 – 2026 | Current GPA: 2.7 / 4.0

PRACTICAL EXPERIENCE

Cyber Security Intern – WE Telecommunications (120 Hours)

- Conducted vulnerability assessments on internal networks using tools like Metasploit.
- Analyzed network traffic with Wireshark to detect and identify potential security threats.
- Assisted in developing and implementing basic network defense strategies.

TECHNICAL SKILLS

- Programming Languages: Python, C#, Java, JavaScript, HTML/CSS, SQL.
- Tools & Frameworks: Wireshark, Metasploit, Kali Linux, Node.js, MATLAB.
- Databases: MySQL.
- AI Libraries: NumPy, Pandas.
- Operating Systems: Linux, Windows.
- Soft Skills: Problem-solving, Communication, Teamwork.

PROJECTS

- Automated Attendance System: Developed a system using Python and OpenCV for facial recognition to automate attendance tracking.
- Social Media DB Clone: Rebuilt a database clone using MySQL for data storage and the Flask framework for back-end feature testing.
- Secure Banking App Prototype: Simulated a secure application in Java for processing transactions and maintaining secure activity logs.
- Blockchain Wallet: Engineered a secure wallet for digital transactions using cryptographic principles to ensure data integrity.
- Smart Robotic Arm: Designed and built an Arduino-based robotic arm that responds to real-time sensor inputs.

CERTIFICATIONS

- 120-Hour Cyber Security Training – WE Telecommunications (2024).

LEADERSHIP & ACTIVITIES

- Active member in the Student Union, contributing to cybersecurity awareness initiatives.
